

## OM

- Deepak Sarkar

The sound Om (Auum) of Big Bang spreading everywhere!  
With its derivatives higher and higher  
As darkness, light, emptiness, and atmosphere  
Creating stars, galaxies, and universal network!  
Impacting all as waves of creative power!

We see it bright as the sun light!  
We feel it tuned down by the darkness of night!  
We exclaim it at the dawn in horizons  
We appreciate it as it changes seasons!

We hear it when something catches fire!  
In drum beats, blowing wind and steaming water!  
In heart beats, touches, scratching, and choir!  
In speeches, music, shouts, songs, and loving desires!  
In rain drops, snow showers, and rhymes of nature!  
In water falls, bird's calls, in sufferings and cheers!

When lightening strikes, thunder roars, storms whisper on trees!  
Volcano erupts, bomb blasts, waves pound on beach!  
As realization in loving hearts and vision beyond reach -  
Silent message of Om in souls evolve in life primitive!  
As atom vibrates, seeds germinate, foetus conceived!
